Comment.

25X1

* The Soviet Zone grain import program has been under way since mid-January 1952. The Soviet Zone Ministry for Transport, dated 5 January, a total of 34,500 tons of grain was scheduled to be shipped by rail from the U.S.S.R. to the Soviet Zone of Germany during the period from 1 through 30 April 1952. Actually, a total of 4,190 carloads of grain entered the Soviet Zone during the period mentioned. On the assumption that an average carload of grain consisted of 15 tons, this would result in a total of 62,850 tons of grain imported. Information available on the handling of the grain import program indicates the following:

	Scheduled Amount	Tons of Grain Actually Delivered
February	65,000 tons	71,250 tons
March	45,500 "	60,400 "
April	34,500 "	62,850 "
Total	145,000 tons	194,500 tons

SECRET/CONTROL/US OFFICIALS ONLY

- 5 -

This tabulation shows that the actual imports exceeded the targets fixed by 19,500 tons. This surplus may be explained by the possibility that part of the grain shipments arriving by water were transloaded to rail. Another explanation may be that, at the request of the Soviet Home Government, part of the shipments scheduled to be imported in May and June were delivered during the period from February through April in order to forestall supply difficulties. The figure of 20,255 tons contained in a previous report must be corrected to read 71,250 tons. [REDACTED]
